MARINE EQUIPMENT DIRECTIVE

THE CHALLENGE

The EUROPEAN UNION COUNCIL DIRECTIVE 96/98/EC has been repealed and the new DIRECTIVE 2014/90/EU has to be implemented.

Since September 18th, 2016 all manufacturers of maritime equipment have to ensure full compliance with DIRECTIVE 2014/90/EU. Otherwise they are not in the position to issue a Declaration of Conformity anymore and products might be rejected at EU borders.

THE CONSEQUENCE

ALL non-EU manufacturers of Marine Equipment have to appoint an Authorised Representative (AR) in the European Union, who ...

- ... stores the EU Declaration of Conformity and technical documentation for at least 10 years – depending on the lifetime of a product.
- ... provides authorities with all information and documentation to demonstrate conformity of a product on short notice.
- ... cooperates with authorities to eliminate risks posed by products.
- ... is the first point of contact for the authorities.
